

# Let's Widen the Healthcare Gap!

Health care premiums and profits are at a record high, and George Bush is making sure they'll stay that way.

President Bush's Prescription for PROFITS:	President Bush's Prescription for the PUBLIC:
<p>Insurance premiums are rising four times faster than earnings.</p> <p>The average family is paying \$2700 more than they did only four years ago. This added cost is ten times more than the average middle-class family's tax cut delivered by George Bush's tax packages.</p> <p>President Bush's plan prohibits Medicare from negotiating with drug companies for lower prices on behalf of taxpayers.</p> <p>President Bush has closed veterans' hospitals, but he's not stopping there. His 2005 budget will double veterans' prescription drug co-payments. Best yet, it includes a \$2.6 billion shortfall in veteran's healthcare funding. That's \$2.6 billion more for our tax cuts.</p>	<p>The 44 million Americans without insurance don't pay any premiums at all!</p> <p>Whatever happened to an apple a day?</p> <p>You can always buy your medicine from Canada. Oh wait—you can't.</p> <p>What? <i>Someone</i> has to pay for our tax cuts!</p>

**If you're a billionaire, congratulations! You hit the jackpot with the Bush Administration.**  
**If you're a regular person who works hard and plays by the rules, well...**  
**Tough luck—buy your own president.**
